MF3 MotorMedic™ High Mileage Motor Flush

MotorMedic™ High Mileage Motor Flush is a blend of sludge dissolving solvents which can be added to an engine a few minutes before an oil change to flush out deposits and free valves and rings. Not recommended for Turbo Charged gasoline or diesel engines. For Turbo Charged gasoline and diesel engines, use our Synthetic Motor Flush (Part# MFD1).

Frees up sludge associated with slow city driving. Can be easily used by car owners or professional technicians just before oil changes.
